"The 10'1"C is a shorter version of the 10'8"C, designed to net a finished thickness from 3 3/8" to 3 7/8" or more. I recommend the 10'2"B for thinner boards. The 10'1"C features a flat deck with a fuller rail and wider nose and tail to accommodate classic Longboards, Pigs, and high performance Longboards. Despite the thickness, it's designed to accommodate broad rocker changes and fill foil out nicely at the suggested thickness."
